Studying Virtual Math Teams

Studying Virtual Math Teams centers on detailed empirical studies of how students in small online groups make sense of math issues and how they solve problems by making meaning together. These studies are woven together with materials that describe the online environment and pedagogical orientation, as well as reflections on the theoretical implications of the findings in the studies. The nature of group cognition and shared meaning making in collaborative learning is a foundational research issue in CSCL. More generally, the theme of sense making is a central topic in information science. While many authors allude to these topics, few have provided this kind of detailed analysis of the mechanisms of intersubjective meaning making. This book presents a coherent research agenda that has been pursued by the author and his research group. The book opens with descriptions of the project and its methodology, as well as situating this research in the past and present context of the CSCL research field. The core research team then presents five concrete analyses of group interactions in different phases of the Virtual Math Teams research project. These chapters are followed by several studies by international collaborators, discussing the... *more on <http://springer.com/978-1-4419-0227-6>*

2009. XXII, 628 p. 40 illus. (Computer-Supported Collaborative Learning Series, Vol. 11) Hardcover

- ▶ **129,95 €**
- ▶ **\$179.00**
- ▶ **SFr. 216.00**
- ▶ **£117.00**

- ▶ Offers comprehensive theoretical framework of CSCL field
- ▶ Offers an extended research agenda
- ▶ Brings together previously fragmented literature
