

Keep up to date with my sculpture by downloading the latest version of my book, "*Works of 3-D Form*." The e-book (pdf) version is available for free at: <http://gerrystahl.net/elibrary/form/form.pdf>. The digital format of this volume allows me to continuously add my latest items to the catalog and other chapters. Viewing the pdf allows you to search the text and zoom in on details of the sculptures.

The book includes a catalog of all my sculptures (over 200) and other 3-D works, as well as discussions of my philosophy of sculpture and descriptions of my techniques. Further information about this volume is available at: <http://gerrystahl.net/elibrary/form>. Versions for Kindle (.mobi) and iBooks (.epub) are available there as well, although they are not up-to-date or well formatted.

Click here: <https://gerrystahl.net/sculpture> to open a webpage with videos of many of my sculptures. Most display the sculpture slowly turning 360 degrees. The videos are brief – about half a minute. They are organized into five groupings:

1. [Videos of some of my wood carvings](https://gerrystahl.net/sculpture/carvings). A catalog of my wood carvings is available at: <https://gerrystahl.net/sculpture/carvings>
2. [Videos of some of my abstract ceramic sculptures](#), modeled in clay and fired.
3. [Videos of some of my modernist ceramic sculptures](#), inspired by Rodin, Degas, Brancusi, Giacometti, Heppenworth, Moore.
4. [Videos of some of my pre-Columbian and prehistoric ceramic sculptures](#), based on artifacts.
5. [Videos of some of my realistic sculptures of the human body](#), based on live or photographed models.

The videos help to display the 3-D form, the "opening up" of the material, and the play of positive and negative space as discussed in my sculpture book. The videos are silent. You can make the video full screen by clicking on the square icon in the lower right corner of the video image. To return from full screen, click on the same icon or press the ESC key. The videos are also on my YouTube channel.
